## Boost Your Own County--Come to Marion Thursday, May 25--Everybody Help Do This!

### CHAUTAUQUA

Big Seven Day Program to be Here June 26, July 3 Many Attractions

Two top-notch dramatic comedies, "Turn to the Right" and "Friendly Enemies," Laurence's Little Symphony Orchestra, former Governor Hiram B. Hays and other head line lecturers, Irene Stulofsky, eminent pianist, unique children's program, Jess Fugh, noted fun specialist and these are among the eighteen notable attractions which will appear here at the big seven day Redpath Chautauqua which opens June 26.

The Collegian Male Quartet, four exceptional singers who are also splendidly accomplished as a brass quartet, will launch the week's program with a popular concert on the first afternoon. Following a prelude by this company at night, Hon. Chas. H. Brough, scholar, educator and for two terms governor of Arkansas, will deliver an eloquent and illuminating lecture, "America's Leadership of the World."

A grand concert given on the second afternoon by the Montague Light Opera Troupe will feature many light opera melodies presented in costume with a wealth of realistic dramatic detail. At night, following a concert by the Montagues, Mr. Hubert W. Hunt, author, scholar and editor, will speak on "The New Intellectual Day," powerfully setting forth practical principles of individual and collective living.

On the third afternoon, Irene Stulofsky, brilliant concert pianist and assisting artists will appear in an artists' recital.

The third night will be Artists' Night with Miss Stulofsky and company and Sidney London, interpreter humorist and scholar.

The Tramer Kura Trio, three gifted entertainers, will present a delightful program on the fourth afternoon, preceding the unique lecture demonstration, "Well-dressed on a Moderate Income" by Evelyn Hansen, noted authority on dress. She will be assisted on the platform by young women models.

On the fourth night comes the irrepressible comedy success "Turn to the Right" with a wealth of amusing and heart-grIPPING episodes.

On the fifth day Laurence's Little Symphony Orchestra of four violins, two cellos and a piano, features an abundance of classical and popular favorites for strings in a grand concert in the afternoon and a prelude at night.

A question of great importance will be presented by Chester M. Sanford, practical expert, who lectures on the sixth afternoon on "Failures of the Middle." A round table follows the lecture.

"Friendly Enemies" delightful comedy drama on the sixth night, runs over with laughs interspersed with moments of gripping pathos. It will be presented by an exceptional New York cast.

Vera's Hawaiians, singers and players, on the last afternoon, clad in their native costumes and playing the musical instruments peculiar to their native land, will give a popular concert, and at night will give an equally popular prelude to a humorous program presented by Jess Fugh, fun specialist extraordinary. The last night's program will be a fitting finale to a great Chautauqua week.

Rev. W. T. Oakley and W. W. Lamb left Tuesday for Greenville, Tenn., to attend the General Assembly of the U. P. Church.

TERMINAL SCENE, LOUISVILLE, KENTUCKY  
Whose Board of Trade Heads of Houses Will Visit Western Kentucky and West Tennessee, May 22-26.

### LOUISVILLE BOOSTERS COMING TO THIS CITY

Party Tours Western Kentucky and West Tennessee on Special Train; 125 in Crowd, Including Louisville Mayor and High Railroad Officials

#### BAND CONCERT--SOUVENIRS PROMISED

An interesting group of boosters from the cities of Louisville, Lexington, and Nashville, Tenn., are expected to arrive in Marion on Tuesday, May 22, for a party tour of Western Kentucky and West Tennessee. The group, headed by President F. M. Barker of the Board of Trade, will be accompanied by a band and will be met by a large crowd of boosters and friends.

The party will leave Louisville on Tuesday morning and will stop at various points along the way, including Lexington, Nashville, and Memphis. The group will be accompanied by a band and will be met by a large crowd of boosters and friends. The party will be a great success and will result in many new friendships and business deals.

Henderson, Ky. .... 7:00 p. m.

### BILLY YATES ON EVANGELISTIC TOUR

Evangelist W. H. Yates and daughter, Miss Eva Yates, arrived here Tuesday, having completed a number of engagements in several Kentucky cities.

At Stanford they assisted Rev. E. K. Arnold, pastor of the Methodist church of that city, in a two weeks revival meeting. Evangelist J. W. Carter did the preaching and a large number of conversions was the result of the meeting.

At Elizabethtown they were engaged with Pastor J. R. McAfee, of the Methodist church, in a great religious revival of two weeks duration. Rev. J. W. Weldon, pastor of the Madisonville Methodist church did the preaching. Large crowds attended the services and splendid music was one of the pleasing features of the meetings. The results were 30 conversions and 36 additions to the church.

After staying at home a week Bro. Yates will go to Wilmore to attend the State Convention and also to be present at the Commencement Exercises of Asbury College.

### ARRESTED HERE

Charged With Obtaining Money Under False Pretenses

Sunday afternoon a stranger, giving his name as Joyce J. Mastin, came to Marion, claiming that he is a Baptist minister working in the interest of the starving people of Russia under the direction of the American Committee for Russian Relief, a Chicago organization. He gave his home as Guthrie, Ky. Before coming to Marion he visited Crayne and delivered a discourse in one of the churches, asked for and received a donation for the poor in Russia.

After showing his credentials he was granted permission to give an address at the First Baptist church here Sunday evening.

Monday morning Mastin was arrested under a warrant charging him with obtaining money under false pretenses. He was brought into court for an examining trial, Judge E. J. Travis on the bench. The Commonwealth was represented by John A. Moore and County Attorney E. D. Stone. Senator W. J. Deboe represented the defense. The case was hotly contested and attracted great interest.

The prosecution read an extract from a paper in which it was stated that Mastin was not what he represented himself to be but was a fraud.

The following telephone messages were read by the defense. From the Lawrenceburg Bank:

Question: Do you know the Rev. Mastin? Ans. I do.

Q. Is he all right, is he reliable or not? A. I never heard anything against him. He is all right.

From the Allenville, Ky., Bank: Question: Are you acquainted with Rev. Mastin? A. I am.

Do you know if he sends money to the Russian Relief Fund? A. He does. Q. Do you know if he is a crook, or an honest man? A. He is all right. I never heard anything wrong with him.

From Lafayette Bank: Question: Do you know Rev. Mastin? A. I do. Q. Did you receive a wire confirming his authority to collect for the Russian Relief Committee? A. We did, also received a letter from Chicago to the same effect. He is all right.

The prosecution read a telegram from New York reading "Cannot understand your telegram. What should we wire Edward Stone? Signed The Soviet Russian Relief Fund." He was held by the court under a \$500 bond to the action of the grand jury. He was guarded by city officials until Wednesday when the association for which he is working telegraphed money to pay his bond and he was released.

#### WARNING

If you wish to give of your money to help the suffering multitudes in the Near East be careful to whom you give the same as many unauthorized persons are endeavoring to obtain money for this work without due authority.

The only legal organization in Crittenden county (with the exception of denominational boards) for the collecting or obtaining money for relief work in the East is the Near East Relief Organization which is chartered by Congress and which works under the authority of Congress, having its headquarters at Washington, D. C., and in each state.

If you desire to help the sufferers give your contributions to either of the following well known and respected citizens of Crittenden county who are the only authorized persons to receive the same.

Mr. T. H. Cochran, who is the Chairman of the Near East Relief for the county, Mr. H. C. Franklin who is the duly appointed Treasurer, Rev. E. N. Hart, who has been appointed by Headquarters as lecturer for Western Kentucky.

To these men and these only should donations for this work be given. Any other person who solicits with-out their authority is unworthy.

(Signed) E. N. HART  
Princeton, Morganfield and Henderson are contestants for the new State Normal school to be located somewhere in Western Kentucky.  
Mr. H. K. Woods was in town Tuesday.

### DEATH CLAIMS DR. MATLOCK

Dr. E. Vernon Matlock, a well known physician of Livingston county, died at a Paducah hospital Thursday of last week of mastoid trouble. He is survived by his wife who before her marriage was Miss Almer Ladd.

Funeral services were held at the Union church at Salem, conducted by Rev. J. S. Roe, pastor of the Christian church of which he was a member. The pastor of the Methodist church also assisted in the services.

Dr. Matlock was a Mason and a member of Salem Lodge No. 81. Masonic services were held at the cemetery, W. D. Cannon being master of ceremonies. A large number of relatives and friends were present and the floral offerings were magnificent.

#### BACCALAUREATE SERMON

The Baccalaureate Sermon to the graduating class of Marion High School was preached at the Main Street Presbyterian Church Sunday morning by Rev. A. D. Litchfield, pastor of the Methodist church at Princeton. The subject of the discourse was "The Conjunction of Faith and Privileges" and was a splendid discourse and was listened to by one of the largest audiences ever assembled in that church.

The sermon was pronounced by many to be one of the best discourses ever delivered to a graduating class within the history of the school. The class was composed of 17 graduates, six boys and eleven girls.

#### LIBRARY BUILDING BURNED

The Library building of Rev. Jas. J. Price, on North Main street was destroyed by fire Wednesday morning. The blaze being discovered about two A. M. A coal house containing about 100 bushels of coal, was also burned. It is not known how the fire originated.

The building contained a splendid library of 2,500 volumes, a typewriter, four big book desks, a filing cabinet, the table and other articles of furniture.

The loss is estimated at \$5,000, with some insurance on the library. The fire had effects of the fire destroyed the residents would have been.

#### WISS PRIZE IN CONTEST

Dorothy Haynes won first prize in a Declamatory Contest held at the School Auditorium Tuesday morning before the graduating class of the eighth grade Marion Graded School. There were four contestants. The winner's subject was "The Sign of the Cross," and dealt with the terror and final triumph of the Christian during the reign of the bloody Roman Emperor, Nero.

NOTICE W. H. W.

All members of Greenwood Camp No. 22 are requested to meet at the Woodman Hall at 7:30 P. M. Friday. Important Call Meeting.

LEONARD HURST, Com.  
J. H. NIMMO, Clerk

#### CEMETERY CLEANING

All who are interested in the Chapel Hill Cemetery will meet there on Tuesday, May 30 "Decoration Day," to clean off the grounds and decorate the graves.

Services will be held. Bring dinner and spend the day.  
J. T. HIGHAM

#### BB. MEETING OF COLORED PEOPLE

The General Assembly of the United Christian Presbyterian Church is in session at the U. C. P. Church here this week. The National Non-School Convention, held in connection with the General Assembly, opened Tuesday morning. Rev. J. M. Dethong, of Fayetteville, preached the opening sermon.

The General Assembly met Thursday morning with a sermon by Rev. C. G. Boulette, of Paducah. The meetings will close Friday evening. Many visiting ministers, delegates, and out-of-town visitors are in attendance as well as large congregations of home folks.

#### HERBERT BARNETT DIES

Herbert Barnett, 40 years old, son of James C. Barnett, of Ravine, Miss., and a nephew of the late Wm. Barnett, of this city, was killed May 7, by the explosion of a boiler of a mill where he was at work in Georgia.

He is survived by his wife and three children.

#### IMPROVEMENTS BEING MADE TO MARION MILLING CO'S PLANT

For the last four weeks Marion Milling Company have had with them Mr. Thas Mungus, the expert millwright, who for the past 25 years has been in the service of Wardlaw Marman Co., of Indiana, overhauling their mill and adding new machinery wherever necessary to bring their plant strictly up to date. Mr. Mungus says the mill is now one of the best equipped mills in West Kentucky and that the company is now in a position to compete with the big mills of the country.

The firm is proud of their plant and the citizens of Marion and Crittenden county are lucky to have such an enterprising firm and up to date flour mill in the community.

Mr. R. I. Nunn says that the best is none too good for their customers.

Rev. E. N. Hart, Clarence Mayes, S. L. Carnahan, I. Pierce, W. H. Cannon and R. E. Wilborn attended the funeral of Dr. F. V. Matlock at Salem Friday.

### SUMMER NORMAL SCHOOL

AT MARION

For

Teachers and Prospective Teachers

BEGINS JUNE 6th

## CHAPTER XV.

Swept along by a passionate excitement that seemed actually to consume her, Cherry lived through the next three days. All noticed her mood, and asked her more than once what caused it. Cherry would press a hot cheek to hers, smile with eyes full of pain, and flutter away. She was well, she was quite all right, only she—she was afraid Martin would summon her soon—and she didn't want to go to him—!

Suspecting something gravely amiss, All tried to win her confidence regarding Martin. But briefly, quickly, and with a sort of affectionate and apologetic impatience, Cherry refused to discuss him.

"I shall not go back to him!" she said, breathing hard, and with the air of being more absorbed in what she was doing than what she was saying.

"But do you mean that you are really going to leave him?" the older sister questioned.

"I don't know what I'm going to do," Cherry half smiled.

"But, dearest—dearest, you're only twenty-four; don't you think you might feel better about it as time goes on?" All urged. "Now that the money is all yours, Cherry, and you can have this nice home to come to now and then, isn't it different?"

Cherry was looking at her steadily. "You don't understand, All," she said.

"I understand that you don't love Martin," All said, perplexed. "But can't people who don't love each other live together in peace?" she added, with a half smile.

"Never as man and wife!" Cherry stammered.

All sat back on her heels. In the ungraceful fashion of her girlhood, and shrugged her shoulders.

"Think of the people who are worrying themselves sick over bills, or sick wives, or children to bring up!" she suggested hopefully. "My Lord! if you have enough money, and food, and are young, and well—"

"Yes, but, All," Cherry argued eagerly, "I'm not well when I'm unhappy. My heart is like lead all the time; I can't seem to breathe! People—can't it be possible that people are different about that?" she asked timidly.

"I suppose they are!" All conceded thoughtfully. "Anyway, look at all the fusses in history," she added carelessly, "of grand passions, and murders, and empires, and the fate of nations—resting on just the fact that a man and woman hated each other too much, or loved each other too much! There must be something in it that I don't understand. But what I do understand," she added, after a moment, when Cherry, choked with emotion, was silent, "is that had would die of grief if he knew you were unhappy, that your life was all broken up in disappointment and bitterness."

"Is that my fault?" Cherry exclaimed, with sudden tears.

All, after watching her for a troubled minute, went to her and put her arm about her. "Don't cry, Cherry!" she pleaded sorrowfully.

Cherry, regaining self-control, resumed her work silently, with an occasional, sudden sigh. She had opened the subject with reluctance; now she realized that they had again reached a blank wall.

Three days after their talk in the moonlit garden Peter found chance to speak alone to Cherry.

"Are you really?" he asked.

"Quite," she said, raising blue eyes to his.

"It's tomorrow, then, Cherry?" he said.

"Tomorrow?" He saw the color ebb from her face as she asked him. She was already late afternoon, perhaps too late to leave home, and she was alone in the house. "I'll be there at five," she said, looking at her watch.

"Tomorrow you will be gone?" he said.

"I'll be all right," she answered. All saw the color ebb from her face as she asked him. She was already late afternoon, perhaps too late to leave home, and she was alone in the house. "I'll be there at five," she said, looking at her watch.

"I'll be all right," she answered. All saw the color ebb from her face as she asked him. She was already late afternoon, perhaps too late to leave home, and she was alone in the house. "I'll be there at five," she said, looking at her watch.

sister. All received the kiss, smiled, and stretched in the sun.

"Heavenly day to waste in the city!" said All.

"I know!" Cherry said nervously. She had been so strangely nervous and distracted in manner all morning that All had more than once asked her if there was anything wrong. Now she questioned her again.

"You mustn't mind me!" Cherry said with a laugh. "I'm desperately unhappy," she said, her eyes watering. "I'd do anything in the world to help you, Cherry!" All said sympathetically.

"I know you would, All! I believe," Cherry said, trembling. "That there's nothing you wouldn't give me!"

"That's easily said," All answered carelessly. "For I don't get tired of things, as you do. My dear, I'd go off with Martin to Mexico in a minute. I mean it! I don't care a whisp where I live, if only people are happy."

"How about that?" Cherry said, as the dog leaped to his place on the front seat and licked his mistress's ear.

All embraced him lovingly.

"Well—if he wanted to go with you," she conceded unwillingly. "But he wouldn't!" she added quickly. Cherry, going to the train, gave her an April smile, and as she took her seat and the train drew on its way, it seemed to her suddenly that she might indeed meet Peter, but it would only be to tell him that what they had planned was impossible.

But on the deck of the Massillon steamer, dreaming in the sunshine of the soft, lazy autumn day, her heart turned sick with longing once more. All was forgotten, everything was forgotten except Peter. His voice, his tall figure, erect, yet moving with the little limp she knew so well, came to her thoughts. She thought of her first on the other steamer, only a year from now, safe in his care, Martin for-

known—how much had she be-

trayed—

Gazing, trying to smile, she looked up at him, while the ferry place whirled about her and pulsed drummed in her ears. She had automatically given him her hand; now he kissed her.

"Hello, Cherry; where you going?" for the third time.

"I came into town to shop," she faltered.

"You what?" She had not really been listening, and she felt it, with a pang of fright. He must not suspect the steamer was there, only a short time away; Peter might miss them, a chance word might be fatal—he must not suspect.

"I'm shopping," she said distinctly, with dry lips. And she turned to go.

"Well," Martin said, "surprised to see you?"

"Oh, Martin—" said her flustered voice. "I was in the other public of heart and soul she knew that for safety's sake she must not let him see her."

"I'm going to tell you something that will surprise you," he said. "I'm through with the Massillon people."

"Martin?" Cherry gasped almost violently. She looked from a flower vendor to a newsboy, looked at the cars, the people—the most not faint. She must not faint.

"Well—but where are you going?"

"I was going to the doctor a minute, but it's not important." They had turned and were walking across the ferry. She knew that there was no way in which she might escape him. "What did you say?" she said.

"I asked you when the next boat left for M.D. Valley?"

"We can go—let's go!" Cherry's thoughts were racing. She must leave Peter somehow. It was twenty minutes of eleven by the ferry clock. Twenty minutes of eleven. In twenty minutes the boat would sail. She thought desperately if the woman's waiting room upstairs, she might plead the necessity of telephoning from it. But it had but one door, and Martin would wait at that door.

Suddenly she realized that her only hope of warning Peter was to send a messenger. But if Martin should chance to meet her messenger, with the boat, when he met her, and her sending of a message to Peter here—

"I think there's a boat at eleven something," she said hesitantly.

"Suppose you go and find out?"

She glanced toward the entrance of the Massillon waiting room, a hundred yards away, and a mail bag leaped in her heart. If he turned his back on her—

"What are you going to do?" he asked, somewhat surprised.

"I ought to telephone All," her despair told her. If he went to the ticket office, and she took a telephone booth, she might escape him yet! While he dawdled here, minutes were flying, and Peter was waiting every car and every platform, torn with the same agony that was tearing her. "If you'll go find out the exact time and get tickets," she said, "I'll telephone All."

"Tickets?" he echoed, with all Martin's old, menacing shrewdness. "Haven't you got a return ticket?"

"I have no return," she blundered.

"Oh, then I'll use your message," Martin said. "Telephone," he added, nodding toward a row of booths, "as hurry; we've got time to spare."

She remembered that he liked a masculine assumption of command where all trains, tickets, railroad connections, and transit business of any sort were concerned. He liked to let her elaborate while other people were waiting, fixed to pull out his big watch and assure her that they had all the time in the world. She tried to call a number, but the booth paid a staring gaze at her and refused him.

"I can't get through," Martin said. "That's all right," she said, and went to the ticket office. From the booth she called to him. "Peter's coming," she said.

Cherry turned, answered him, and the announcement was made in her hand and ears. Her voice had no sound at all.

"Well, Martin, I've been there for two months!"

"I'd just as soon have them!" Martin exclaimed, indignantly.

But the direct thought had helped Cherry. Irritation had served her, and the reminder of Martin's old, trying stupidity had lessened her fear of him.

"I've got to send a telegram—for All," she said.

"What about?" he asked, less curious than flustered.

"Gently to some people who are sailing!" Cherry answered, calmly.

"Only don't mention it to All, because I promised it would go earlier!" she added.

"I saw the office back here," he told her. They went to it together, and he was within five feet of her while she scribbled her note.

"Martin met me. Nothing wrong. We are returning to M.D. Valley, U. S. A." She glanced at her husband, he was standing in the doorway of the little office, looking. Quickly she ad-

ressed the envelope. "Don't read that name out loud," she said, softly but very slowly and distinctly, to the girl at the desk. She put a gold piece down on the note. "Keep the change, and for God's sake get that to the Harvard, sailing from Dock 67, before eleven!" she said.

The girl looked up in surprise; but rose immediately to the occasion. Cherry's beauty, her agonized eyes and voice, were enough to awaken her sense of the dramatic. A sharp rap of the clerk's pencil summoned a boy.

"George, there's a dear in that for you if you deliver it before eleven to the Harvard!" and she. The boy went to the Harvard, sailing from Dock 67, before eleven!" she said.

"And now for the boat!" Cherry said, rejecting Martin, and opening to him her natural voice. They went back to the Massillon ferry entrance again, and this time they found All in real earnest, and presently found themselves on the upper deck of the boat, bound for the valley.

Until noon and in occasional rushes of terror still, she had been absorbed in the business necessity of despatching, of covering her own traces, of anticipating and closing possible avenues of betrayal. But now Cherry began to breathe more easily, and to feel things about her, like a tide, the half-forgotten easelessness of her relationship with this man in the boat.

She had thought to escape the necessity of telling him that she was not willing to return to him, she had been wrapped in dreams so great and so wonderful that the thought of his anger and resentment had been as nothing to her. But she had that to face now.

She had it to face immediately, too. She knew that every hour of post-ponement would cost her fresh humiliations and disappointments, and as the boat pulled away from the bank, she thought of the half-way point, the gateway all her forces for the final. The boat's engine impressed the boat from Martin was the appalling fact that he did not dream that she had intended to never their names completely and finally.

What was the valley? Here you are! He interrupted the flow of his own train of thought.

"Oh, no, Martin!" she answered. "I—I don't know. I always loved it."

All is a fine girl who is a nice girl. Martin answered. "But I can't go lower. It may be all right, but that's all right, and then Knapman and Knapman staff will be all right, but I don't get it!" And he yawned contentedly in the sunbath.

After a few seconds he gave Cherry an oblique glance, examining her face. But she was thinking too deeply even to hear him. Her hand was working so busily as a signal, and her thoughts circling frantically, trying windows, walls, and doors in the prison in which she found herself, and for escape.

She looked toward Martin now for a moment, and she saw his face and fear she felt in the shock of their unexpected meeting. In a moment, this disquieting and apparently irremediable return to the valley house, that it was too late now! Too late for anything, but a bold and brave and cruel half-hour that stood, at any cost, under them.

Quick upon the thought came another, what should she and Peter plan now? For to suppose that their lives were to be guided back into the old hateful channel by this mere mischance was preposterous. Within a few days their interrupted trip must be resumed, perhaps tomorrow—perhaps this very night they would make it successful. Meanwhile, until she could see Peter again, there was Martin to deal with, Martin who was leaving her, valuing or undervaluing her, but in any case, he had made her his enemy.

Temperature of Ocean Water.

The surface water of the ocean is the most important factor in the climate of the world. The temperature of the surface water is determined by the amount of heat received from the sun. The temperature of the surface water is also determined by the amount of heat lost to the atmosphere. The temperature of the surface water is also determined by the amount of heat lost to the ocean floor.

Refinishing Nickel Plating.

A new nickel plating solution said to yield beautiful results is prepared by mixing the liquid obtained by evaporating a solution of one-half ounce nickel in aqua regia to a pasty mass and dissolving it in one pound of aqueous ammonia, with that obtained by treating the same quantity of nickel with a solution of two ounces cyanide of potassium in one pound of water. More cyanide renders the deposit whiter and more ammonia renders it brighter.

The temperature of the surface water is also determined by the amount of heat lost to the atmosphere. The temperature of the surface water is also determined by the amount of heat lost to the ocean floor.

Refinishing Nickel Plating.

A new nickel plating solution said to yield beautiful results is prepared by mixing the liquid obtained by evaporating a solution of one-half ounce nickel in aqua regia to a pasty mass and dissolving it in one pound of aqueous ammonia, with that obtained by treating the same quantity of nickel with a solution of two ounces cyanide of potassium in one pound of water. More cyanide renders the deposit whiter and more ammonia renders it brighter.

# RADIO

## PROGRESS OF RADIO THROUGH THE YEARS

Wireless Research Began Long Ago, But Development Has Been Swift Lately.

Wireless research started many years ago, as far back even as 1827. Even the radio telephone is not a recent perfection; rather it is that introduction to the layman of the human voice and made it suddenly popular. Until something that wireless men had thought a pastime or amusement here in the chronological record of wireless.

1827—It was found that the magnetic discharge from a Leyden jar would magnetize a steel needle.

1831—The transatlantic telegraph was discovered between two entirely separate circuits by Michael Faraday.

1837—Cooke and Wheatstone of London, England, and Morse of the United States take out first patent for electric telegraph.

1840—J. A. Mendenhall of Mauch suggested that a system of wireless telegraphy could be constructed after the discovery of the use of the ether waves.

1840—Joseph Henry (U. S. A.) produced the first high-frequency electric oscillations and stated that the condenser should be in coil circuit.

1842—Wireless experiments were made by R. F. M. Morse by electric induction through water across Washington canal and across wide rivers.

1843—A wireless system for transatlantic communication was suggested.

1845—Water was used as a conducting medium in wireless experiments across a wide river.

1849—Intelligible signals were actually sent across a river 4,500 feet wide in India, but the test was found impracticable for commercial use.

1857—The electric waves that are now utilized in wireless telegraphy and telephony were produced in an

distance of 60 miles by radio signals.

1861—Radio communication started with two islands in the Hawaiian group. The first British ship is fitted with the wireless telegraph.

1862—Radio signals received aboard vessels at sea at 1,500 statute miles. Signals received from a distance of 2,000 miles.

1863—King Edward receives a radio message from President Roosevelt. High-power stations were ordered by the Italian government. First transatlantic radio message sent. Telegraphic news service for ships at sea is started. Marconi knighted in Russia.

1864—The first press message was sent across the sea.

1865—Patent suit started in New York between the Marconi and the Forst company.

Patent for horizontal directional aerial is taken out. This was a great step forward in long-distance work.

1866—International conference is held in Berlin, at which most of the countries of the world are represented.

1867—The use of steel coils for producing waves were successfully tested.

1868—Stations in Ireland and Nova Scotia were opened for limited public service.

1868—Radio stations opened for unlimited public service between Great Britain and Canada.

1869—Stations in collision with another at the coast of Florida caused in sailing assistance by radio.

1870—Marconi receives a message 2,700 miles while on board ship going to South America.

Spanish radio company formed.

1871—Canadian government leased radio stations for 20 years.

1871—Radio distress signals from the Titanic being assistance and save lives of 700 passengers.

1873—Tests were made between the Hotel tower in France and the station at Washington. During the trip into Central Asia an explorer received his longitude and time signals from a distant radio station.

1874—Marconi and radio officials start test of wireless telephone between vessels of the Italian fleet. The test was continued between vessels on the high seas and voices were heard with clarity at a distance of 44 miles. One day radio telephone communication was kept up constantly for 12 hours. Great Britain declared war

## Where Your Taxes Go

How Uncle Sam Spends Your Money in Conducting Your Business

### XV.

#### BUDGET SYSTEM A START

The remedy is already being applied to remove some of the conditions I have described. A budget plan has been put into effect. A director of the budget, in the person of Gen. Charles H. Dawes, has been appointed to office. General Dawes is at work now trying to find out in detail where the money comes from which you pay to run the government and where it goes and how properly to apportion it among the spending agencies of the government. He is just at the beginning of his big task, but the work has begun. That is the important thing.

The budget and accounting act provides for the presentation by the President of a regular and alternative budget of the United States to congress on the first Monday in December, 1921, covering the fiscal year ending June 30, 1922.

Recognizing in the budget machinery created by this law an agency through which executive policy and procedure involving better business administration could be asserted, Mr. Harding assembled on June 20, 1921, for the first time, the heads of departments and independent organizations and bureau chiefs, and after announcing a government policy of economy and efficiency, directed that an immediate attempt with the budget machinery be made to reduce expenditures under the appropriations of the current year ending June 30, 1922.

General Dawes, director of the budget, has reported to the President \$12,512,038.32 as the estimated savings in expenditures reported to me by the heads of departments and independent organizations. In compliance with your directions to all concerned to secure a reduction in expenditures under appropriations and balances available during the current fiscal year, where consistent with the mandatory obligations imposed by congress, either direct or indirect.

"If this amount \$2,512,113.14 per cent in savings is appropriated and involving for the most part building and construction, will be postponed for expenditure in future years unless otherwise decided by congress. Whatever may be the result of this expenditure to total revenues at the end of the current year, which, for

various reasons, including possible new legislation, the operations of the shipping board, the railroad administration, and fluctuation in current receipts of the postoffice department, cannot be predicted at this time, the above amount is that much of a contribution to a more favorable relation.

"This fine response to your request from the heads of the departments and independent organizations and bureau chiefs, incidental to your assumption of responsibility as the business head of governmental administration, infers the existence in their minds of three principles involving improvement in governmental business, which should not be overlooked.

"First, that the business organization of government hereafter assume that the minimum amount of money to be expended in any fiscal year is not, of necessity, the sum appropriated in advance by congress, but the smallest amount upon which the business of the government can be efficiently administered under the program outlined by congress.

"Second, that the minds of the business administrators of government have been diverted from a too easy reliance upon the custom of deficiency appropriations.

"Third, that where congress has directed the expenditure of certain sums for specific purposes, an executive pressure will now be exerted for more efficient and economical administration in order to produce greater result from the given expenditure, and also wherever possible, to complete the given project for a less amount than the total appropriated for the purpose."

The budget system was established because of an acute public interest in the expenditures of government, actively and continuously displayed by the tax payers. It was established in response to a public demand. The house of representatives has changed the way of appropriating money to conform to the budget system. It has only one great appropriation committee which authorizes all the expenditures for the house. The senate has not followed suit. If this newly established budget system is to be a success it must have your active support and understanding and derive an added authority from your approval and support.

### WRITE TO THESE MEN.

The chief defects, or points where waste is apparent in the conduct of the business of the government that I have pointed out in these articles have been, first, the excessive paper work of the government, second, the waste for military expenditures, and third, the chaotic condition and lack of adequate supervision and control of expenditures, which have been in part remedied by the introduction of the budget system, and third, the haphazard organization of the government departments and the haphazard condition that prevailed in government employment.

The remedy for two of these conditions I have treated briefly in the two immediately preceding articles. I come now to the matter of reorganization of the departments and the reclassification of government employees. A beginning has been made on both of these matters.

A joint committee of the two houses of congress, with Walter F. Brown as chairman, is studying the whole question of organization of the government and the function of the various departments and bureaus and independent establishments. I cannot too strongly advise you to keep yourself in contact with the work that joint committee is doing.

I have given you the names of the members of the committee in another article but I will repeat them here. They are Senators Smoot of Utah, Woodworth of New York and Harrison of Mississippi. Representatives Reavis of Nebraska, Temple of Pennsylvania and Moore of Virginia. Write to any of them or to Mr. Brown, the chairman of the committee, who represents the President, with headquarters in the house office building here at Washington.

This is the third or fourth attempt that has been made to effect a general reorganization of the conduct of the business of the executive departments. They have all failed through lack of interest. There was lack of public interest, and consequently lack of interest in congress.

This joint committee is at work now. It is collecting facts. It is finding out the actual condition. It is studying the departments. Presently it will make a report to congress. If you will show an active, insistent interest in the work that it is doing, congress will take action. If you do not show this interest, there is every chance in the world that no action will be taken, and that things will remain much as ever.

Hundreds of special interests are clamoring for the attention of congress. All of them are organized. Most of them keep representatives bare at Washington. They present to

individual members of congress in a haphazard, almost visible way, requests to support the less than they are willing to do. It would take me three columns of this newspaper merely to print a list of the requests and suggestions that are here to keep congress mindful of their interests.

In this great clamor the common public interest is likely to be submerged. In fact too often it has been submerged. This matter of economy and reorganizing the business of the government and taking up the tedious details of administration is a dull business. It has been neglected and put off time after time because of a lack of public interest and driving force behind it.

If you will supply this driving force now and display a sustained interest, you can at least put the business of government of the United States on an efficient basis. Congress has been negligent because you have been negligent, but now at last the thing has run along so far that something must be done about it.

Used Insects to Fight Insects. The introduction of their natural enemies has become an important technique during the last generation, writes Paul Popescu in Science. But if competent observers are to be trusted, the southern Arabs employed the same method more than 100 years ago in the culture of the date palm.

In his "Relation d'un Voyage dans l'Yemen," P. H. Reata says: "I was able to verify the singular fact previously observed by Forskal, that the date palm in Yemen are attacked by a species of ant which would cause them to perish if each year the growers did not bring from the mountains and fasten in the tops of the palm branches of a tree that I did not recognize, which contains the nests of another species of ant which destroys that of the date palm."

#### Camera Built on Eye's Plan.

The camera is nothing more or less than a huge model of the eye. Light passing through the lens of the eye is focused on the retina, which corresponds exactly to the ground glass screen or the plate of the camera. Though the retina's chief use is to send an impression to the brain, it is capable of retaining an image for some time. Light has the same effect on it as on a photographic plate. To test the truth of this you have only to look for a moment at some brightly illuminated object, and then to cast the eyes up to the white ceiling; you will find that you see the image of the object for a long time.

WARNING! Say "Bayer" when you buy Aspirin.

Unless you see the name "Bayer" on tablets, you are not getting genuine Aspirin prescribed by physicians over 22 years and proved safe by millions for

Headache  
Toothache  
Earache  
Colds

Lumbago  
Rheumatism  
Neuritis  
Pain, Pain

Accept only "Bayer" package which contains proper directions. Handy "Bayer" boxes of 12 tablets—Also bottles of 24 and 100—Druggists. Aspirin is the trade mark of Bayer Manufacture of Monoclonal Acetylsalicylic Acid.

### NEVER EVEN TOUCHED HER

Reader Must Figure Out for Himself Just What Caused Negro to Jump Over Railing.

A negro was charged with assaulting another negro.

"Lucia Washington," said the judge, "what have you to say for yourself?" "Your honor," replied Lucia, "Ah never touched that woman. Ah never touched her. Ah had reprimanded her for throwin' garbage out back, an' she kept on doin' it, an' this mornin' Ah reprimanded her again. Ah come downstairs from mah flat up above, an' was holdin' up mah right hand jes' like the Statue of Liberty, jes' like Ah'm holdin' up mah right hand now, reprimanding that woman, an' as Ah come close to her, that woman jes' jumped head first over the railing. Ah never touched her."

"What did you have in the hand which you were holding up like the Statue of Liberty?"

"A hatchet."

### A REWARD OF \$5,000.00

Would be a small amount to pay for saving a man's life. If you could save your life for a dollar bill you would hesitate to spend it? You risk your life everytime you drive your car in the rain because you can't see through your windshield. A dollar bill sent to the Baltimore See-Through Corporation, Baltimore, Maryland, will ensure you having a clear windshield for the next three years, as their preparation is guaranteed to keep your glass as clear as a summer's day. Nothing like it on the market. One application will last as long as a rain storm even if it lasts a month. It is absolutely guaranteed to give satisfaction or money refunded. Send for it today and be prepared for the next rain storm.—Advertisement.

#### His Great Mistake.

Joseph L. Brown, head of New York's picture industry, said at a luncheon: "The movies do a lot of good. But they do harm, too, sometimes. Think of the love affairs they break off!" "It's all over," a young man cried out. "It's all over now between Mabel and me!" "Sorry to hear that, old chap," said a second young man. "What caused the split, may I ask?" "I took Mabel to the movies last night, and she said that the heroine of the serial called 'The Pact of Death' was a beautiful girl."

"Well, I agreed with her."

#### YOU CANNOT AFFORD

To let your little hurts and ailments get bad. Keep Vacher-Balm handy for Burns, Boils, Cuts, Corns, Piles, or Soreness anywhere. Ask your druggist. Avoid imitations.—Advertisement.

"Luciferous" Illuminated. Lloyd George is said to have used the word "luciferous." An unusual adjective, but not, we think, an invention of his. An Englishman asked an acquaintance what he would understand by "a luciferous story." The other replied: "Like one of yours; a devilish bad one."—Boston Transcript.

### Sure Relief FOR INDIGESTION

25¢ and 75¢ Packages, Everywhere

### Kill All Flies!

They spread disease. Kill them with DAILY FLY KILLER. Kills all flies, mosquitos, house flies, etc. in 10 minutes. No harm to man or animal. Write for sample and full directions. DAILY FLY KILLER, 347 West 11th St., New York, N. Y.

### W. N. U., MEMPHIS, NO. 19-1922.

Elizabeth A. Bergner, Radio Instructor in Lane Technical High School, Chicago, and Her Class.

address before the Royal Society in London, England.

1880—The sending of an electric current through earth was systematized by studied by John Trowbridge of Harvard. It was found that signal light might be carried on over large distances between places not connected by wires.

1883—It was found that telephonic speech could be conveyed by induction over a space of quarter mile. This experiment took place in England.

1884—Electric waves were suggested as being particularly suitable for the sending of signals through fog.

1892—An instrument for the detection of electromagnetic waves was discovered which was given the name of a "coherer."

1894—A scientist of Berlin signaled through three miles of water.

1895—High frequency waves excited curiosity of Senator Marconi.

1895—First patent for practical wireless transmitting system is taken out in London by Marconi. Afterward, successful signaling was carried out over distances as great as one and one-quarter miles. Sir William Preece of the British postoffice system is interested in Marconi's wireless experiments.

1897—Marconi establishes communication between points four miles distant. Balloons were used to suspend antennae.

Marconi demonstrates his wireless system before the king of Italy, communicating with two Italian warships nine miles distant.

The first Marconi station is erected on the Isle of Wight and experiments conducted over a distance of 14 miles.

Near the end of the year the first floating wireless station was successfully operated.

1898—The first paid marconigram was sent from the Isle of Wight station.

1898—Reports made on lighthouse accident by radio. First French gunboat is fitted with radio apparatus. In Vienna communication between two balloons is established. New York Herald receives radio report of international yacht races. The British war office introduces Marconi apparatus into the South African battlefields.

1898—German vessel communicates a

## Confidence

THE man who considers his bank simply as a depository for his funds is not availing himself of a bank's resources. There should be the utmost confidence between the bank and depositor. You should feel at all times at liberty to ask questions pertaining to your business, our ideas on stocks, bonds and other investments, values of all kinds, and so on.

In fact, we would be pleased to have you consider us an adviser on anything that directly or indirectly involves money.

### SCHOOL IMPROVEMENT CLUB

The School Improvement Club will meet Friday afternoon at 3:30 at the School Auditorium. This will be the last meeting of the year and a full attendance is requested as there are several matters of importance to be attended to. MRN WALTER McCONNELL, President.

### THE REVIVAL MEETING

The revival is now in full way and many are coming to Christ. Evangelist Lear is bringing wonderful messages each evening. His sermons are scriptural, systematic and wonderful in thought. He preaches a pure gospel, clear from slang, but fights sin hard. He urges the people to clean out the church so that conversions may be on a basis of a deeper conviction. Evangelist Lear is great in his illustration, making the plan of salvation so plain that no one can fail to understand the way of life. Lear is one of the best evangelists in the field. He has had great success in making taroards on sin wherever he has gone, and lifting the people to a higher standard of Christian living. He is to preach the baccalaureate sermon for the Morehouse High School at 11:00 A. M., May 14, 1922.—Morehouse (Mo.) Messenger.

### NOTICE W. O. W.

Every member of Rosewood Camp No. 22 W. O. W. and members of neighboring camps are invited to attend the decoration exercises at Freedom church on the third Sunday in May. Preaching at 11:00 A. M. Dinner for all Decoration services at 2:00 P. M. and preaching at 3:00 P. M.

Marion, Ky.

Your satisfaction with a car depends upon your satisfaction with its performance, appearance, economy, comfort and price.

These are the vital points. And you must get satisfaction in each one if you are to be satisfied with your car as a whole.

Consider the LIGHT-SIX from this angle. It is essentially the same car as it was when introduced. It was right before it was offered. And it has made good in the service of thousands and thousands of owners. Its dependable, its L-head motor is powerful, flexible and free from vibration than any car at anywhere near its price.

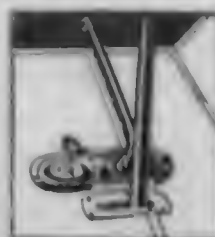

Its gracefulness is enhanced by a lasting finish. Cowl parking lights and the cowl ventilator not only add to its good looks but are necessary for complete satisfaction.

The LIGHT-SIX stands up in service with a minimum of repair expense. This with low fuel consumption, means satisfactory economy.

We never heard of a LIGHT-SIX that was not comfortable to ride in.

And the price, \$1045 f.o.b. factory, is out of proportion to its value. This price includes the theft-proof transmission lock which reduces the rate of theft insurance to the owner 15 to 20 per cent, large plate glass window in one-piece rear curtain, inside and outside door handles and other refinements.

And you get the priceless ingredient—prestige and high standing of the maker—who for 70 years has been building quality vehicles and selling them at fair prices.

Theft-proof transmission lock reducing rate of insurance to LIGHT-SIX owner 15 to 20%

Touring, \$1045; 3-Passenger Roadster, \$1045; Coupe-Roadster, \$1375; Sedan, \$1750. All prices f.o.b. factory.

## Everybody Help Boost Marion!

It is not often in towns the size of Marion that a  
whole train load of boosters from a big city comes to  
meet us and talk with us about those things which  
will help us to get better prices for our produce, bet-  
ter stock for our farms, and better schools for our  
children.

This train load of men has expressed a desire to  
meet every man and woman in the county when they  
come to Marion on May 25th. You know why they  
want to come. They want to make business in Louis-  
ville better. They want to make business in Kentucky  
better.

All of us know that when business in Louisville  
is better and when business in Kentucky is better, that  
business in Crittenden County will be better. And  
all of us are hoping for better business in Crittenden  
County. We want to see the Mines in operation again.  
We want to see the stock market open up good and  
strong. We want to see the price of corn and hay go  
up. We want to see tobacco sell as it should.

Then let's get together. Let's come together and  
plan for some of the things that we would really like  
to see come to pass. Come to Marion May 25 and do  
your part to show others that Crittenden County  
means business.

## Marion Chamber of Commerce

May 25 is to be a Gala Day for Marion and Crittenden County. We are to have distinguished visitors that day, in fact a whole train load of them. The "Louisville Boosters Special" carrying 125 or 150 visitors from Louisville including a number of the most influential and prominent men in the city of Louisville will visit Marion on that day. The Marion Chamber of Commerce is going to give to these Kentucky Boosters, men who are interested in our welfare down here in Crittenden County, the heartiest welcome that we know.

We want the farmers, the teachers, the doctors, the business men, everybody who is interested in the betterment of Crittenden County to come to Marion May 25 and help us to welcome our guests that day. Let's get together and plan and work and boost for Crittenden County.

We hope to see you in Marion, Thursday May 25.

Yours for a better Crittenden County.
